

Besglas

Every home deserves our best

Every home deserves our best

Wardrobes and doors are the cornerstones of any home as these are essential elements that your home cannot do without. And yet, they are commonly overlooked as spaces needing attention and design. Often not the centrepiece, these elements and spaces are important, and a well-designed, well-executed space is unobtrusive - you will hardly notice the doors of your rooms or the drawers of the wardrobe.

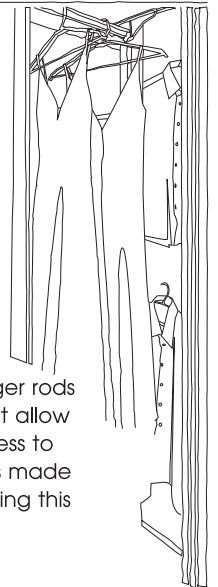

And that is how BESGLAS products work.

Here at BESGLAS, we understand homes are created from how you live and utilise your spaces, so all our products are created to complement and provide the framework for your individual style to shine through whilst emphasis on workmanship & safety.

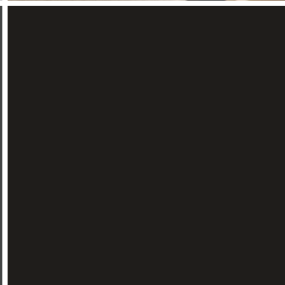

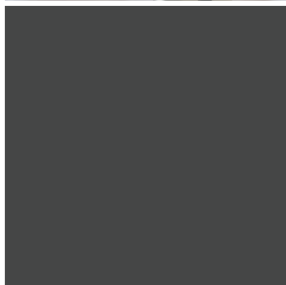

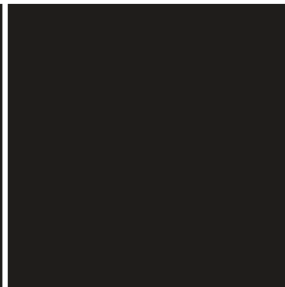

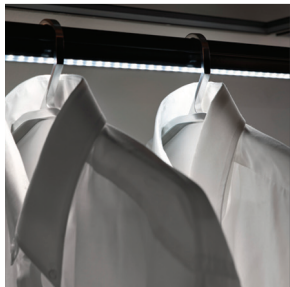

ALUMIX

● Alumix Structural System

From multiple colour safety glass doors, melamine shelves, to the cross-section aluminium hanger rods and organisers, the ALUMIX Structural System is one of our most versatile wardrobe systems that allow you to take stock of all your belongings at a glance. It is not only easy to install but also effortless to disassemble and reconfigure to keep up with the season's look. Most importantly, the system is made from the highest grade aluminium in the industry that can hold up to 15kg per lineal foot, making this wardrobe corrosion free and easy to maintain while keeping your storage space dust-free.

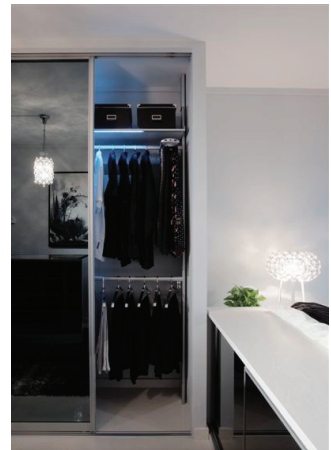

XIMULA

● Ximula Flexible System

Given its fully customisable hand-made collection, the XIMULA Flexible System is a wardrobe system that feels right at home with haute couture. Proudly designed and manufactured in Singapore, the XIMULA Flexible System has earned the Singapore Green Label in approval of our exacting workmanship and quality standards with respect to the environment. Each XIMULA wardrobe is different and no effort is spared in ensuring your home is fitted with the best combination of storage spaces in line with your interior design - technical innovation which allows high load bearing capabilities, premium materials including our patented aluminium joinery concepts and an extensive range of interchangeable componentry in an equally wide range of colours and finishings.
